*Allowable Subject Matter*

1. Claims 43-89 are allowed.

2. The following is an examiner's statement of reasons for allowance:

In interpreting the claims, in light of the Specification and applicants' arguments, the examiner finds the claimed invention patentably distinct from the prior art of record. The prior art fails to teach or suggest, either alone or in combination, a method and apparatus for tracking aggregate web trends comprising normalizing logic operable to form statistics relating to aggregate interests of the plurality of users to emphasize time dependent variation in the aggregate interests.

The examiner finds applicants' arguments filed January 20, 2006 to be persuasive. The applicants argued in substance that the prior art reference to "popularity lists" are not "statistics relating to aggregate interests of the plurality of users in each canonical term over the period of time." See Remarks, page 11, lines 17-25. The applicants also argued the normalizing of the prior art does not emphasize time dependent variations. See Remarks, page 12, lines 5-18. See also, Specification, page 6, lines 5-13.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
